| LinkedIn Profile :- [Suja! Chinchmalatpure](#)

PROFILE

- Final year Electronics and Telecommunication Engineering student at Sinhgad Academy of Engineering with a strong interest in software development and problem solving. Skilled in C, C++, Java, SQL and Data Structures & Algorithms.
- Experienced in developing applications using Object-Oriented Programming concepts and file handling techniques. Completed a software development internship where I gained practical experience in coding, debugging and building console-based applications.
- Seeking an opportunity as an Associate Software Engineer where I can apply my programming knowledge, analytical thinking and continue learning new technologies.

SKILLS

- Programming Languages: C, C++, Java
- Database: SQL, MySQL
- Data Analysis
- Problem Solving & Analytical Thinking
- Communication & Team Collaboration
- Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), File Handling
- Tools & Technologies: Visual Studio, Dev C++, Git (Basic)
- Other Skills: Debugging, Problem Solving, Code Optimization

PROJECT

1. Weather Monitoring Device

- Developed a weather monitoring system using ESP8266 NodeMCU microcontroller and sensors such as DHT11 and BMP180.
- Programmed the system using C++ to collect and process real-time environmental data.
- Designed the system to monitor temperature, humidity and atmospheric pressure.
- The project focuses on improving weather data monitoring and supporting early warning systems.

2. Shopping Mall Management System

- Developed a console-based Shopping Mall Management System using C++.
- Implemented features such as product purchase, stock management and billing generation.
- Applied Object-Oriented Programming concepts for modular and maintainable code structure.
- Used file handling techniques to store and manage product data efficiently.

3. Banking Application

- Developed a console-based Banking Management System using C++.
- Implemented features such as account creation, user authentication, balance tracking and transaction management.
- Used file handling for secure storage and management of customer data.
- Applied Object-Oriented Programming concepts and input validation to improve reliability and maintain structured code.

4. Forest Fire Detection Using ML

- Developed a Machine Learning based Forest Fire Detection system using Python.
- Used libraries such as TensorFlow, NumPy, and Pandas for data processing and model training.

- Built a predictive model using environmental parameters like temperature, humidity, and wind speed to detect potential forest fire risks.
- Focused on early fire prediction to support environmental monitoring and disaster prevention

EXPERIENCE

VTECH Solutions (Internship – 3 Months) (Jan 2025– March 2025)

- Learned and applied programming concepts in C and C++ along with Object-Oriented Programming principles.
- Developed small-scale applications including a Shopping Mall System and Banking Application.
- Practiced debugging techniques and improved coding efficiency using development tools such as Dev C++ and Visual Studio.
- Applied basic Data Structures such as arrays, linked lists, stacks and queues during project development.
- Focused on clean code practices, documentation and structured programming techniques.

EDUCATION

- Pursuing Bachelor of Engineering, Sinhgad Academy of Engineering, Kondhwa, Pune
- Pursuing Honours in AI/ML(Computation Statistics)
- HSC 12th Science, Scored 89.50%, DSPI (Defence Service Preparatory Institute), Chhatrapati Sambhajanagar, 2021-2022
- SSC 10th, Scored 91.60%, St. Francis High School, Amravati 2019-2020

VOLUNTEERING (OR EXTRACURRICULARS)

Volunteer, NSS (National Service Scheme)

- Head the Tree Plantation Drive at Veer, Tal. Purandar, Pune.
- Engage in Value Added Program which is based on Fundamental Education at SAOE.
- Was the Attendance & Discipline Head at NSS SAOE.

Volunteer, ETSA (Electronics & Telecommunication Student Association)

- Vice President at ETSA.
- Was the Event Management Head at ETSA.
- Head the FE Freshers Party 2024.
- Manage the Send Off program at E&TC Department for BE students.

Volunteer, FESA (First Year Engineering Student Association)

- President at FESA and managed 30 member's team.
- Head the FE Induction Program, Wall Magazine Competition.
- Head the NAAC visit in our College.

Volunteer, WillPower

- Engaged in teaching underprivileged children, contributing to their educational development.
- Regularly visited old-age homes, fostering community engagement.
- Contributed to the International event (Dreamcatcher), also managed 800+ crowd)

Sport Achievements

- Badminton: Winner of the District-Level Badminton Championship (2022).
